Art Unit: 2622

1. All pending claims 1-13 and 19-22 are allowed. Claims 21 and 22 are newly added. Claims 1 and 19-21 are independent.

2. The following is an examiner's statement of reasons for allowance:

Claim 1 has been amended to include the limitation "wherein the case is formed with a plurality of projections extending toward the light sources in corresponding relation ship thereto, each of the projections having a tip surface facing a light-emitting surface of a respective one of the light sources for blocking light emitted from the respective light source". This feature in combination with other limitations of claim 1 is not taught by the prior art of record. The examiner agrees with Applicant on that the claimed feature is not taught by the previously applied prior art Sawase et al. (U.S. Patent No. 6,014,231). Please refer to Applicant's remarks filed December 27, 2004, page 9, the second paragraph.

Claims 8-13 depend upon claim 1.

Independent claim 19 was indicated allowed in the previous Office Action dated July 1, 2004. The reason for allowance given in that Action is repeated below.

Claim 19 is allowable over the prior art of record including the closest prior art Sawase et al. (U.S. Patent No. 6,014,231). Sawase et al. does not disclose auxiliary elements provided on the obverse surface of the substrate (6), which auxiliary elements are covered by at least selected ones of the partitions as claimed in claim 19.

Art Unit: 2622

New independent claim 21 and its dependent 22 correspond to previously objected dependent claims 9 and 10, which were indicated to contain allowable subject matter in the previous Office action dated July 1, 2004. The reason for allowance is the same as that for claim 19, for claim 21 (or claim 9) claiming limitations similar to those of claim 19. As discussed for claim 19, Sawase et al. does not disclose auxiliary elements provided on the obverse surface of the substrate (6), which auxiliary elements are covered by at least selected ones of the partitions as claimed in claim 21.

Independent claim 20 has been amended to overcome the art rejection set forth in the previous Office Action dated July 1, 2004. The new limitation "wherein the lens array includes a lens holder and a plurality of lenses held in the lens holder, the projection of the transparent plate coming into pressing contact with the lens holder without contacting the lenses", in combination with other limitations of claim 20 is not taught by the prior art of record. The transparent plate of the closest prior art Iso et al. (U.S. Patent No. 5,489,995) is in contact with the entire top surface of the lens array (7). Please see also the newly cited prior art below, which does not teach the newly added limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2622

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujimoto et al. (U.S. Patent No. 6,496,285) discloses a contact type image sensor (Fig. 3) having a transparent plate (20) having an end section coming into pressing contact with the lens holder (6).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cheukfan Lee whose telephone number is (703) 305-4867. The examiner can normally be reached on 9:30 a.m. to 6:00 p.m., Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on (703) 305-4712. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
